

See the fleet. Choose the priority.

Turn SureMDM device evidence into clear priorities for leadership, supervisors and operations. A shared view of what needs attention, where to act and why.

Executive dashboard | Synthetic demonstration data

From managed devices to informed decisions.

01

See the exposure

Readiness, compliance and data coverage in one view.

02

Focus the response

Compare groups and investigate the devices behind the signal.

03

Plan with evidence

Discuss investment using clear assumptions and fleet context.

The right view. For every decision.

Keep each team focused on the decisions it owns. Connect the executive signal to group priorities and device evidence.

01
LEADERSHIP

Where should we focus?

Review readiness, compliance coverage and group exposure. Compare investment scenarios with explicit cost assumptions.

02
SUPERVISORS

Which teams need attention?

Compare assigned groups. Identify charging needs, connectivity gaps and patch priorities before the next shift.

03
OPERATIONS

What explains the finding?

Inspect device evidence, record intervention notes and follow case status. Keep the response connected to the finding.

Compare the groups. Choose the next intervention.

Where intervention matters					Current snapshot
Compare groups, then assign a response.					
Device group	Devices	Readiness	Compliance	Missing or stale evidence	
 Central warehouse	200	47.0%	93.6% 173 fresh monitored devices	37	
 North distribution	200	42.0%	95.5% 132 fresh monitored devices	30	
 South distribution	200	52.0%	93.9% 180 fresh monitored devices	26	
 Field sales	200	47.5%	95.2% 167 fresh monitored devices	35	
 Retail operations	200	55.0%	96.0% 174 fresh monitored devices	29	
 Head office	200	52.0%	96.0% 173 fresh monitored devices	34	

Supervisor group comparison | Fictional fleet of 1,200 devices across six groups

EVIDENCE YOU CAN EXPLAIN

Make the decision. Keep the context.

Decision confidence starts with understandable indicators, visible blind spots and access that matches responsibility.

TRACEABLE INDICATORS

See the scope, denominator and observation age behind each KPI.

VISIBLE UNCERTAINTY

Separate missing or stale evidence from confirmed compliance and readiness.

ACCOUNTABLE FOLLOW-UP

Track intervention status and notes alongside the device evidence.

GOVERNED ACCESS

Leadership sees aggregates. Field teams see their assigned groups. Administrators manage access.

ILLUSTRATIVE DECISION

95.0%

Compliance needs a denominator.

949 of 999 devices with fresh monitored evidence are compliant. Another 201 devices sit outside that scope. Review the coverage gap before judging the entire fleet.

Start with the decisions that matter.

Connect your SureMDM evidence, agree the thresholds and validate the priorities with your teams. Work in French or English.
